

## TouchBoard Projector Security Cage

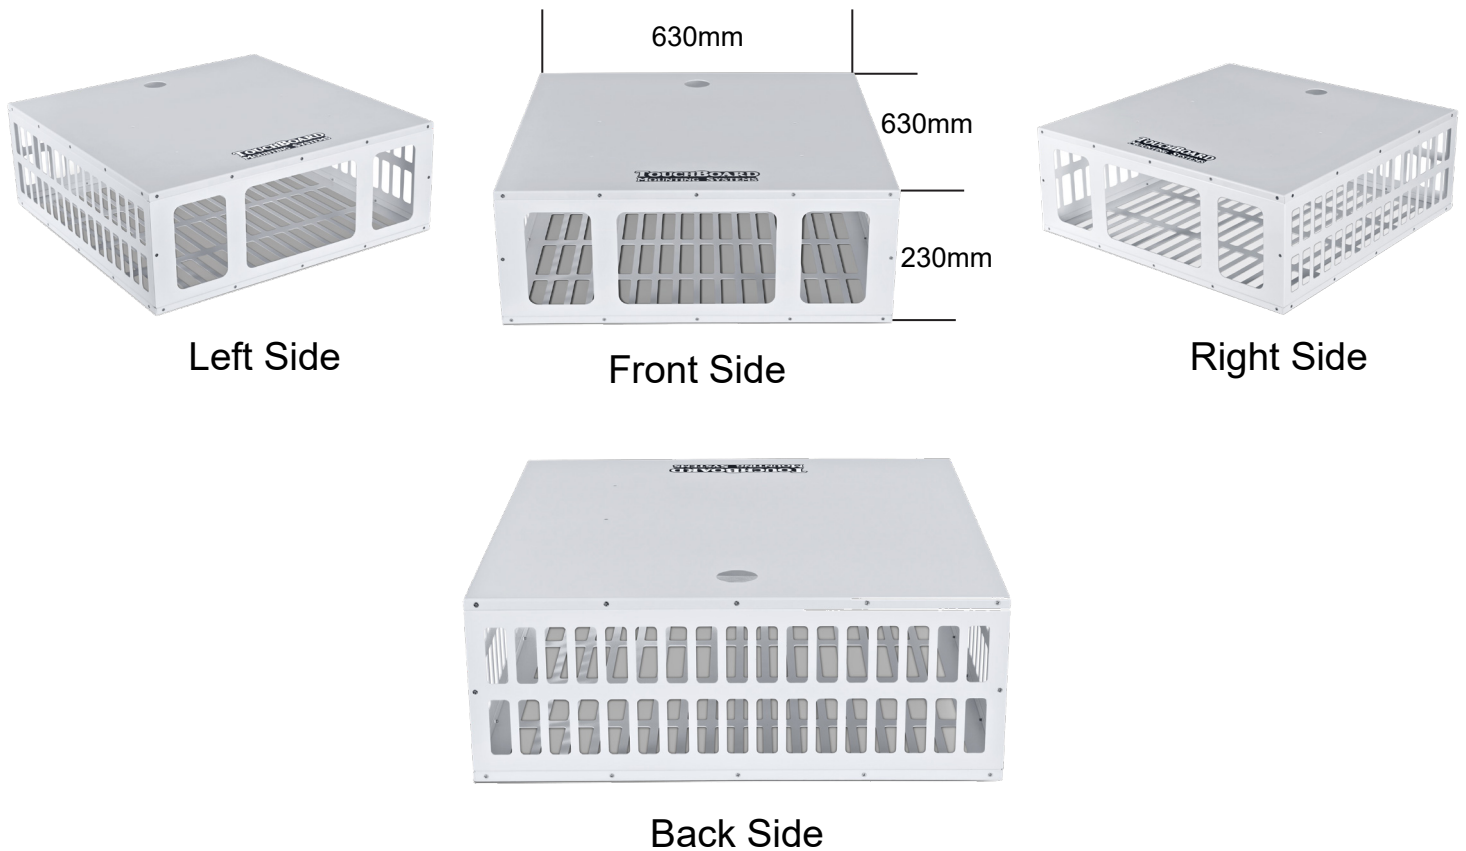

The TouchBoard Security Cage will fully enclose your projector and provide both shock impact protection and theft deterrent. The design accommodates a wide variety of projector models with lenses positioned to the centre, left or right. The Security Cage's open side and bottom design provides exceptional ventilation and cooling.

The Security Cage's strong steel construction provides a sturdy and robust solution to protect your valuable audio visual investment. Its flexible mounting options ensures easy installation and integration.

Available in white and designed to work with most brand mounting poles and projectors, the TouchBoard Security Cage is a great solution for school halls, gymnasiums, and outdoor installations where an impact and theft solution is required.
