

## Assembly to Wall Instructions

### TouchBoard Wall Fixed Height System TBMS-WALL-FH

#### **Warning**

Severe personal injury, possible death and property damage can result from improper installation or assembly. Read the following warning carefully before commencing installation:

- This product must only be installed by a qualified audio visual installer or suitably licensed tradesman.
- If you do not understand the instructions or have any concerns or questions, please stop installation immediately and contact TouchBoard or your local supplier.
- Do not continue with installation if hardware is damaged or missing. If hardware is damaged or missing please contact TouchBoard or your local supplier.
- Only use this product for its designed purpose and within stated manufacture specifications.
- The manufacturer disclaims any liability for the modification, improper installation or use of product outside its weight range. The manufacturer will not be liable for any death, injury or damages arising out of the use, or inability to use this product.

This instruction is to assist in securing the fully assembled system to a wall structure. If you require the system build instruction, please refer to document - [Installation Instructions TouchBoard Wall Fixed Height System TBMS-WALL-FH](#)

#### Step 1 – Marking the Position of the Assembled System onto the Wall / Floor

- Place Bottom Extrusion Caps (8) onto the floor

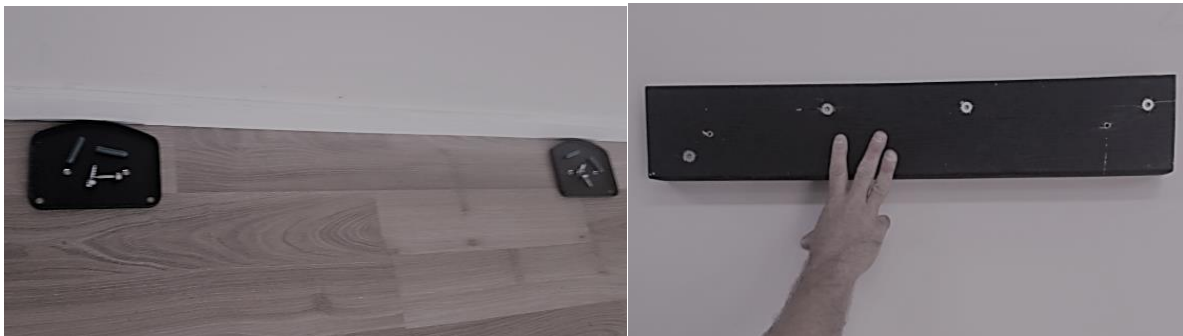

- Lift Assembled System into Bottom Extrusion Caps and hold into desired position against the wall

- Mark the location of the Bottom Extrusion Caps (B) and Upper Bracket (A)
- Remove Assembled System from wall

#### Step 2 – Securing the Upper Bracket Packing and Bottom Extrusion Caps to Wall / Floor

- Secure Bottom Extrusion Caps onto Floor using appropriate fasteners
- Secure the Upper Bracket Packing to the Wall using appropriate fasteners. The Upper Bracket Packing must be securely fastened into solid wall studwork to avoid the system falling.  
*Severe personal injury, possible death and property damage can result from improper installation or assembly to the wall and must be installed by a qualified audio visual installer or suitably licensed tradesman.*

#### Step 3 – Securing the Assembled System to the Secured Brackets

- Lift Assembled System into secured Bottom Extrusion Caps and hold into desired position against the wall
- Screw the Upper Bracket to the secured Upper Bracket Packing using appropriate fasteners
